

## SELF ASSESSMENT

### What makes a strong and successful team?

A strong and successful team is underpinned by four key elements. Project completion depends equally on all elements. Keep in mind these elements as a guide for your team's self-assessment throughout the challenge.

<b>Communicate</b>	Communication among peers involved in the team occurs throughout the challenge and in a timely fashion.
<b>Collaborate</b>	Collaboration with peers in your team takes place in at least one of the following ways: Share feedback and reflection on the challenge journey Share ideas and resources for one another's roles within the team Pair up and co construct aspects of the design solution or presentation with another peer
<b>Document</b>	Solution creation and implementation is visually documented by team, for sharing with a wider audience. This would include adding regular posts to your team space.
<b>Share</b>	Solution is shared with other teams and teacher(s). Solution is shared with at least one additional group outside of the Global Innovators Challenge.
